## Description

This section provides the basic information about the park or trail and the organizations responsible for it.

### Regional Significance Statement

#### Classification

Natural Resource Based Regional Park

#### Overview/Description of Park or Trail

Hole-in-the-Mountain Prairie is a part of a 4,300 acre prairie area that begins at the south end of the City of Lake Benton along U.S. Highway 75, and runs south toward Altona State Wildlife Management Area. This Prairie is a 1,157-acre prairie and oak savanna wildlife preserve. The preserve, situated on a steep valley, is part of a larger glacial escarpment that runs from southwest Minnesota through northeast South Dakota. Locally, this region with its undulating terrain, is known as Buffalo Ridge. Native Americans called the half-mile-wide prairie valley "Mountain Pass" or "Hole-in-the-Mountain".

Buffalo Ridge, dividing the Mississippi and Missouri River basins, is a large expanse of rolling hills. It stands 1,995 feet above sea level. This region includes some of the highest land in Minnesota.

Located on Buffalo Ridge, Hole-in-the-Mountain Park is comprised of approximately 1,000 acres of woodland and prairie land. Hole-in-the-Mountain Park, with its steep hills and rolling terrain, provide seven miles of challenging and scenic natural trails. Whether its horseback riding, biking, hiking, or snowmobiling, the park trails are in use spring, summer, winter and fall.

Hole-in-the-Mountain Park is comprised of two campgrounds. The lower campground is located on the south side of U.S. Highway 14, while the upper campground, commonly referred to as Horse Hill, is located on the

---

north side of U.S. Highway 14.

In addition to scenic views and trails, the lower campground offers 30 electrical/water/sewer campsites and more additional non-electrical tent sites. Other amenities within the campground include two picnic shelters, a chalet building - with restrooms, showers, and a 2-story indoor gathering space for guests - as well as a 1.141 mile hard-surfaced non-motorized loop trail, allowing runners, bicyclists and pedestrians of all ages, to enjoy the picturesque landscapes.

Horse Hill, the upper campground area of the park, is a regional treasure for equestrians. This campground offers 30 electric campsites, each site equipped with a hitching post for horses.

Located one-half mile from the park, Lake Benton Lake offers ample outdoor recreational activities such as fishing, ice-fishing, swimming beaches, boating, water-skiing, tubing and more. At approximately 7-miles-long, Lake Benton is one of the largest lakes in southwest Minnesota and ranked among the 10 best walleye lakes in Minnesota drawing tourists from not only the local region but other states such as Nebraska, Iowa, and nearby South Dakota.

The City of Lake Benton has a 1.2 mile trail within the city limits that is connected to Hole-in-the-Mountain Park. Additionally, the Lincoln County Trails Task Force, has designed a plan to construct a Lincoln County Trails System. It is a 10-year multi-phase plan to build trails that would not only connect major points within Lincoln County, but would not only connect Hole-in-the-Mountain Park to neighboring trails and amenities, but would also connect multiple communities, regions and potentially states.

# Facility Listing

This section provides an overview of existing and proposed site facilities and general site characteristics .

## **Existing Facilities**

- Camping-cross-section of camper types
- Electric/water/sewer RV sites
- Electric/water campsites
- Non-electric campsites
- Group campsites
- Tent only sites
- Camper Cabins
  
- Picnicking and picnic shelters
- Hiking Trails (natural)
- Mountain Biking Trails (natural)
- Cross-country Skiing Trails
- Horseback Riding Trails (natural)
- Visitor Center
- Restrooms/sanitation building
- Roads and Parking Areas

## **Proposed Facilities**

- Camping-cross-section of camper types
- Electric/water/sewer RV sites
  
- Picnicking and picnic shelters
- Walking Trails (paved)
- Biking Trails (paved)

---

## Proposed Facilities Other Information

Disc golf course

## Master Plan

**Additional Supportive Information:**

## Classification Details

**Natural Resource Based Regional Park Classification.**

**Provides a High-Quality Outdoor Recreation Experience**

**Criteria #1 Images**  
Horse Hill Campground

---

Hole-in-the-Mountain Park is comprised of two campgrounds. The lower campground is located on the south side of U.S. Highway 14, while the upper campground, commonly referred to as Horse Hill, is located on the north side of U.S. Highway 14. Hole-in-the-Mountain Park contains 7 miles of natural trails for horseback riding, mountain biking, hiking, cross-country skiing, and winter snowmobiling.

In addition to scenic views and trails, the lower campground offers 30 electrical/water/sewer campsites and more than 30 non-electrical tent sites.

The campground offers a 1.141 mile hard-surfaced non-motorized loop trail, allowing runners, bicyclists and pedestrians of all ages, to enjoy the picturesque landscapes.

Horse Hill, the upper campground area of the park, is a regional treasure for equestrians. Horse Hill campground offers 30 electric campsites each equipped with a hitching post for horses. Horse riders from around the region enjoy not only the 7 miles of natural trails throughout the park, but many more off-trail acres posing further adventures to experience beautiful views of undulating woodland and prairie landscape.

Each year Hole-in-the-Mountain Park is the main stage for regionally unique celebrations including Saddle Horse and Benton-Fremont Days/Te Tonka Ha celebrations.

Saddle Horse Holiday draws visitors (and more than 800 horses) to the park. With its outdoor equine arena, Horse Hill is the perfect venue for the annual two-ring horse show and other equestrian events throughout the year.

Benton-Fremont Days/Te Tonka Ha, also held at Hole-in-the-Mountain Park, is an annual celebration that includes a weekend of entertaining pioneer reenactments.

Located within a short walking distance from the park, Lake Benton lake offers ample outdoor recreational activities such as: fishing, ice-fishing, swimming beaches, boating, water-skiing, tubing and more.

Hole-in-the-Mountain Prairie is a part of a 4,300 acre prairie area that begins at the south end of the City of Lake Benton along U.S. Highway 75, and runs south toward the Altona State Wildlife Management Area. This Prairie is a 1,157-acre prairie and oak savanna wildlife preserve. The preserve, situated on a steep valley, is part of a larger glacial escarpment that runs from southwest Minnesota through northeast South Dakota. Locally, this region with its undulating terrain, is known as Buffalo Ridge. The prairie valley is the headwaters of Flandreau Creek, which runs toward the Big Sioux River. Native Americans called the half-mile-wide valley "Mountain Pass" or "Hole-in-the-Mountain".

Buffalo Ridge, dividing the Mississippi and Missouri River basins, is a large expanse of rolling hills. It stands 1,995 feet above sea level. At sixty miles long, Buffalo Ridge runs through five counties in the southwestern corner of Minnesota.

The Buffalo Ridge landscape is unique and unexpected among the flat prairies of southwest Minnesota. Hole-in-the-Mountain Park is a gem in the region for its topography, woods, and views, all within walking distance of the amenities of the small rural City of Lake Benton.

The preserve is an excellent habitat for rare prairie-dependent insects including 25 species of butterflies thriving on the native grasses and forbs protected here (Dakota skipper and Ottoe skipper, both threatened species), and the Uncas skipper, an endangered species. The Dakota skipper which was first discovered near Volga, South Dakota, survives on only a few scattered virgin prairie habitats in the Dakotas, Iowa, and Minnesota. Other animals include nesting waterfowl, passerines and other grassland birds.

There are over 60 species of grasses, sedges, and rushes, 10 species of trees and shrubs, and 200 species of wildflowers found here.

**Well-located and Connected to Serve a Regional Population and/or Tourist Destination**

Due to its location along the Buffalo Ridge, Hole-in-the-Mountain Park is unique and a treasured destination as evidenced by the 7,000 people who annually visit Hole-in-the-Mountain Park.

Hole-in-the-Mountain Park is conveniently located along U.S. Highway 14, and U.S. Highway 75. It is 32 miles Southwest of Marshall, MN (pop.13,480), 28 miles East of Brookings, SD (pop. 22,900), 66 miles Northeast of Sioux Falls, SD (pop. 164,670), and 77 miles Northwest of Worthington, MN, (pop. 12,940).

The City of Lake Benton has a 1.2 mile trail within the city limits that is connected to Hole-in-the-Mountain Park. The Lincoln County Trails Task Force, has designed a plan to construct a Lincoln County Trails System. The Trails Task Force has a 10-year multi-phase plan to build trails that would not only connect major points within Lincoln County, but would not only connect Hole-in-the-Mountain Park to neighboring trails and amenities, but would also connect multiple communities, regions and potentially states.

The first phase of the proposed Lincoln County trail system will be a scenic by-way around beautiful Lake Benton Lake. This phase also includes a plan to connect Hole-in-the-Mountain County Park to Norwegian Creek County Park, then connecting to Stoney Point Campground and Recreational Park.

The proposed trail will encompass some of the State's more picturesque sites and destinations. Sites will include multiple accesses to a recently designated water trail on Lake Benton Lake, historical marker and plaque at the former City of Marshfield Township (the first organized community and county seat for Lincoln County), Fox Slough (a well known recreational area for hunting, water fowl and wildlife viewing), and a historic 1850 era settler cabin at its original location at Hole-in-the-Mountain.

**Fills a Gap in Recreational Opportunity within the Region**

Located on Buffalo Ridge, which is unique among the flat prairies of southwest Minnesota, Hole-in-the-Mountain Park is comprised of approximately 1,000 acres of woodland and prairie land.

Recreational Opportunity

[01.Criteria4\\_Recreational Opportunity\\_c541ad.png](#)

---

Hole-in-the-Mountain Park entails 7 miles of natural trails for horseback riding, mountain biking, hiking and snowmobiling. Whether its horseback riding, biking, hiking, or snowmobiling, the park trails are in use through the spring, summer, winter and fall ?? a Four-Season Funland. With the steep hills and rolling terrain, the Mountain Biking club (students from South Dakota State University in Brookings, SD) spends their summers enjoying the unique, challenging trails at Hole-in-the-Mountain Park.

With 30 campsites in the park being equipped with hitching posts to accommodate guests and campers with horses, Horse Hill campground offers more unique opportunities to the region. Each year, hundreds of equestrians come to Hole-in-the-Mountain Park, not only enjoy the 7 miles of natural trails winding through undulating woods and prairies, but to experience the picturesque views of the surrounding landscape.

At approximately 7-miles-long, with more than 18 miles of shoreline, Lake Benton is one of the largest lakes in southwest Minnesota and is ranked among the 10 best walleye lakes in Minnesota drawing tourists from not only the local region but also from other regions such as Nebraska, Iowa, and nearby South Dakota as well.

Historic sites can also be found at Hole-in-the-Mountain Park, including a Trading Post built in 1862 belonging to Major Brown which is marked in the northern part of Hole-in-the-Mountain Park. Also located on the original site within the park is a home of early settlers, the historic Synder log cabin.

Hole-in-the-Mountain Park is a treasure in the region for its topography, woods, and scenic hills all within walking distance of the amenities of the rural City of Lake Benton.
