

## General

This section provides the basic information about the park or trail and the organizations responsible for it.

**Last Update:** January 24, 2019 10:56:18

**GMRPTC Park/Trail ID#:** 16-017D

**Park or Trail Name:** Stanley Eddy Park Reserve

**Park or Trail Type:** County Park

**District:** 4

**Regional Designation Status :** Undesignated

**Evaluation Score :**

**Park/Trail Address:** 4190 Rhoades Avenue NW

**City:** Annandale

**Zip:** 55302

**Latitude:** 45.214331

**Longitude:** -94.240061

**Location Description:** Stanley Eddy Park Reserve is located in the hills of French Lake Township, between the Cities of Annandale and Cokato, along the western border of Wright County. Stanley Eddy Park Reserve is a short 15-minute drive from a variety of communities, which include: Annandale, South Haven, Kimball, Cokato, Dassel, Maple Lake, and Kingston. The population base of these communities, and the two townships where the park is located, is over 13,000 people.

From Buffalo, MN you will: Drive on Minnesota State Highway 55 West for 8.2 miles, turn left onto County State Aid Highway 37, follow County State Aid Highway for 11.3 miles, then turn right on to Rhoades Avenue NW, drive North for 1.1 miles. The park entrance will be on your right-hand side.

## Description

**Regional Significance Statement:** Stanley Eddy Regional Park Reserve has been attracting park users to come and experience its unique landscape since its establishment in 1961. The Park is highlighted on the Biological Survey, completed by the DNR, and contains some of the most significant native wildlife habitat in the region. This unique habitat includes abundant rolling terrain covered by a red oak, sugar maple, basswood forest along with plant communities include ginseng, tamarack, and orchids.

**Classification:** Natural Resource Based Regional Park

**Overview/Description of Park or Trail:** Paul and Bernice Eddy helped establish Stanley Eddy Regional Park in 1961 through an initial donation of 160 acres in memory of their son, Stanley. Since that time, Wright County has acquired lands to increase the size and protect the unique biological and ecological attributes of this important park reserve. Today, Stanley Eddy Park Reserve is an impressive park divided into three separate units totaling 930.24 acres, making it one of the largest parks in District 4. Park units include the North Unit (346.59 acres), Moose Lake Access (69.89 acres), South Unit, and the newly acquired Alama Unit (combined 513.76 acres). The South and Alama Units are connected by a trail easement. The master plan also includes 86 acres (already included in the park unit acre numbers) of three parcels currently being purchased by Wright County through a grant program. Two parcels are connected to the South Unit along the trail easement and one parcel is connected to the Moose Lake Access. The land purchases will be completed by the end of January 2019.

The North Unit and South Unit are highlighted on the Biological Survey that was completed by the Minnesota Department of Natural Resources Ecological Services. The Park is considered a reserve and is managed in that sense with very limited intrusion to the native landscape.

Stanley Eddy Park Reserve has abundant rolling terrain that is covered by red oak, sugar maple, basswood forest, and numerous wetland basins with tamarack swamp, wet meadow, poor fen, shrub swamp, and emergent vegetation. Rare plant communities include ginseng, tamarack, and orchids. Rare animals inhabiting the area identified by the DNR include cerulean warbler and the red-shouldered hawk. This area also provides excellent habitat for other wildlife such as wild turkey, white-tailed deer, red fox, and various songbirds.

Park users get to experience this native landscape through a variety of park amenities including three trail head areas with parking and primitive restrooms, backpack camping sites, and public access to Moose Lake. In addition, there are 7 miles of trails used for hiking, cross-country skiing, snow shoeing, and horseback riding. In the South Unit of Stanley Eddy Park Reserve, trail users can access the highest point of elevation in Wright County.

With limited opportunities for horseback riding in the area, the equine trails at Stanley Park Reserve have proven to be one of the more desirable facilities. Stanley Eddy Park Reserve is also the only park in the Wright County Parks System that allows backpack camping and no fees are charged for either backpack camping or horseback riding.

**Total Acreage or Mileage :** 930

**Acquisition and Development Status:** Existing Park of Trail

**Describe land acquisition status:** Active

---

**Percentage of land acquired:** 95

**Development status:** Some development, but more proposed

- Existing facilities to be upgraded

**Regional Context :** Within the Greater Minnesota Regional Parks and Trails inventory, District 4 is fortunate to have many designated facilities. The difference between these more highly developed outdoor recreation Regional Parks is that Stanley Eddy is the only park managed specifically as a reserve. Stanley Eddy Park Reserve is a special and unique place because of its native landscape and park amenities. Stanley Eddy Park Reserve is here to provide access to, protect, and manage representative areas of the original landscape and vegetation types of the region. Park users can appreciate and enjoy the natural resources that influenced the regional settlement. The goal and mission of this Park provides unique opportunity for education that is not available at other regionally designated parks within District 4.

A regional context map has been included in the graphics to illustrate the lack of similar facilities in Wright County. The only park located within 30 miles of Stanley Eddy offering protected native habitats, hiking/cross-county skiing, horseback riding, and backpack camping is Lake Maria State Park. Crow Hassan Park Reserve offers similar park amenities but is located outside Wright County.

Each year, Stanley Eddy Park Reserve hosts numerous events that bring in significant visitors. In the past, some of these events have included; Minnesota Master Naturalist Fall Color Hike Series, Dassel/Cokato Elementary School 4th Grade Spring Field Day, Dassel/Cokato High School Outdoor Adventure Class Skills Day, and Home School Network fall hikes. This park is an important educational asset to Wright County and the surrounding areas and will continue to partner with schools and other organizations to bring people out to the park through recreational and educational programs.

Since there are no entrance fees charged for the use of this park, it is difficult to maintain records on where typical users travel from to use Stanley Eddy Regional Park Reserve. Phone inquiries about the park, and special-use permits for backpack camping, are two ways we identify where visitors come from. Over the past three years, Wright County has maintained records on how far users traveled to experience Stanley Eddy Park Reserve. Most visitors came from areas in Wright County including: Montrose, Annandale, South Haven, Maple Lake, Howard Lake, Hanover, Delano, Monticello, Cokato, and Buffalo. People also traveled considerable distances to recreate in this maple-basswood ecosystem from communities such as St. Cloud, Sauk Rapids, Litchfield, New Prague, Brooklyn Park, and Minneapolis.

### **Regional Map uploads:**

## **Site Information**

This section provides an overview of existing and proposed site facilities and general site characteristics

### **Existing Facilities**

- Camping-cross-section of camper types
- Tent only sites

### **Proposed Facilities**

- Camping-cross-section of camper types
- Tent only sites

- 
- Picnicking and picnic shelters
  - Hiking Trails (natural)
  - Cross-country Skiing Trails
  - Horseback Riding Trails (natural)
  - Lake Access for power boats
  - Fishing Piers
  - Restrooms/sanitation building
  - Roads and Parking Areas
  - Hiking Trails (natural)
  - Cross-country Skiing Trails
  - Horseback Riding Trails (natural)
  - Fishing Piers
  - Nature Center/Interpretation Trails
  - Restrooms/sanitation building
  - Roads and Parking Areas

### **General Site Characteristics**

The North and South Park Units are the most popular of the park and contain the two features Stanley Eddy Park Reserve is most known for. They are the abundant forested rolling terrain and numerous lakes and small wetland basins. Rare plant communities located in the North and South Units include ginseng, tamarack, and orchids along with rare animals including the Cerulean Warbler and the Red Shouldered Hawk. The South Unit also allows park users to access the highest point of elevation in Wright County and 1,223 feet.

The newly acquired Alama Unit will provide future park users with a different landscape experience. This unit is less forested and offers rolling terrain with views across open fields, wetlands, and small lakes. This contrasting landscape will provide the opportunity to restore forested areas but also incorporate prairies within the Park Reserve. Park users will also enjoy viewing an active Heron Rookery located in the south west portion of the Alama Park Unit.

## **Trends/Public Values**

**Public Involvement Summary :** In order to get input from park users and residents, a 10-question survey was created using Survey Monkey. This survey was made available using the Wright County Parks Department Facebook page and included as a newsflash on the County Website. Additionally, past permit holders for camping at Stanley Eddy were emailed a link to the survey. The survey was available from June 15, 2018 to August 20, 2018. The survey indicated that 64% of the people responding to the survey live in Wright County and the majority were 30 years of

---

age or older.

Survey questions ranged from how people use the park, how often they visit, condition of the park, and what people would like to see improved in the park moving forward. Majority of the people that use the park hike or camp so its not surprising that maintaining the existing trails, and adding new trails, along with enhancing existing campsites were the highest ranked priorities to improve in the next 5 years. Managing invasive species, improved signage, adding educational activities, and acquiring land for ecosystem preservations were also high priorities for people responding to the survey.

Detailed survey results can be found in the appendix. It is important to note that the results of the survey are in line and support the park improvements identified in this master plan.

### **Public Involvement Support Material Uploads:**

Description:

[http://dms.gmrptcommission.org/uploads/applications/16-017D/18-08-15\\_Survey\\_Results\\_29dcba.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/18-08-15_Survey_Results_29dcba.pdf)

**Regional Demographic Information :** Wright County covers 716 square miles and lies in East Central Minnesota, bordered on the north by the Mississippi River and the east by the Crow River. About 66% of its land is classified agriculture and, due to its proximity to the Twin Cities Metropolitan Area, Wright County is one of the fastest growing in the state.

Stanley Eddy Park Reserve is located in the hills of French Lake Township, between the Cities of Annandale and Cokato, along the western border of Wright County. Stanley Eddy Park Reserve is a short 15-minute drive from a variety of communities, which include: Annandale, South Haven, Kimball, Cokato, Dassel, Maple Lake, and Kingston. The population base of these communities and the two townships where the park is located is over 13,000 people.

Farmland, rivers and lakes characterize the landscape of Wright County. The county was established in 1855, and named, after much debate, for New York politician Silas Wright, a former U.S. Senator. Monticello became the county seat. Pioneers from all over Europe, with a majority coming from Germany and Sweden, settled in what was then the Big Woods - large stands of oaks, elms and basswood - to make their living from the land.

Buffalo was established as the county seat in 1868 and is the county's second largest city with a 2013 population of 15,812. There are 17 cities and 18 townships that exist in the county which has a total estimated population of 131,000. Between the years 2000 and 2015 Wright County grew in population by over 41,000 residents a 68% growth in population.

Stanley Eddy Park Reserve is a destination for the surrounding communities and for Greater Minnesota. This park will continue to be an important resource for future generations as it protects and preserves the native habitat that existed when Wright County was established.

### **Regional Demographic Uploads:**

Description:

[http://dms.gmrptcommission.org/uploads/applications/16-017D/Regional\\_Context\\_Map\\_Stanley\\_Eddy\\_Park\\_Reserve\\_94da78.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/Regional_Context_Map_Stanley_Eddy_Park_Reserve_94da78.pdf)

### **Public Health Values:**

- Promotes physical activity
- Promotes healthy lifestyle
- Connects people to the outdoors
- Enhances mental health

- 
- Encourages social interaction

**Public Health Values Additional Information :** Research continues to show that human connection to nature is critical to our mental and physical health. This basic human need improves our well-being and overall health, reduces stress and can reduce the symptoms of depression, ADHD, Post-Traumatic Stress Disorder, among others. Connection to nature can help us recover from a physical injury or mental fatigue and improve our cognitive functioning. Continued research tells us that we all feel better when we spend time outdoors.

Stanley Eddy Park Reserve provides a beautiful setting to connect to the outdoors as well socialize with family and friends. The backpack campsites and picnic areas provide places to gather, and the trails promote year-round physical activity and connect park users to nature.

### **Public Health Values Support Material Uploads:**

Description: NRPA Park Programming and Better Health

**Economic Development/Tourism Opportunities :** Outdoor recreation is a large sector of the overall American economy. According to the Outdoor Industry Association, in 2010 \$646 billion was spent on outdoor recreation. Americans spend more on outdoor recreation than pharmaceuticals, motor vehicles, gasoline, and household utilities. As a result, significant jobs and tax revenue are created from outdoor recreation.

Stanley Eddy provides multiple outdoor recreation options including camping, fishing, snow sports, trail sports, and wildlife viewing. All these activities are in high demand for outdoor enthusiasts looking for park lands like Stanley Eddy to provide access to the natural environments.

In an effort to enhance regional connections, economic development, and tourism, Wright County is involved in the Regional Active Living Advisory Group. This group developed the Regional Active Living Transportation Plan which identified the possibilities of connecting the important destinations within four counties (Wright, Sherburne, Benton, Stearns) with a continuous trail system. This will be done through varying types of trails to include right-of-ways, paved trails, and unpaved trails throughout the four-county region.

### **Economic Development/Tourism Opportunities Support Material Uploads:**

Description:

[http://dms.gmrptcommission.org/uploads/applications/16-017D/OIA\\_RecEcoState\\_MN\\_5202b0.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/OIA_RecEcoState_MN_5202b0.pdf)

**Recreational Trends Information :** Wright County is the primary natural resource recreation provider for residents and guests to the area. Our system of parks and trails offers a variety of recreation activities. Residents and visitors are continually looking for more opportunities to engage in active and passive recreation to improve health and to experience the high-quality lakes and natural resources that the county offers. Parks such as Stanley Eddy Park Reserve serve an important role in providing access to outdoor recreation. Planning for the future is important to ensure that current and future residents have access to the type of recreational opportunities that they seek. Current recreational trends involve cross-country skiing, hiking and trail running, bird

---

and wildlife watching, paddle sports, and "destination" play areas. This master plan will provide opportunities for Wright County to modify trail use for current and future park use trends. Periodic updates to the master plan will allow the County to evaluate park uses and to make adjustments to recreation activities, based on user interests and needs. The main amenity that park users appreciate is the natural biological diversity of Stanley Eddy Park Reserve. The current location of park reserves in the region is included on the park reserve context map and illustrates how the Stanley Eddy Park Reserve fills a gap in service in a rapidly-growing area of Minnesota

## **Classification Details**

### **Natural Resource Based Regional Park Classification.**

#### **Criteria 1: Provides a High-Quality Outdoor Recreation Experience:**

Stanley Eddy Park Reserve offers a high-quality user experience that is rarely found in counties along the I-94 corridor. With the reserve being highlighted in the Biological Survey that was completed by the Minnesota Department of Natural Resources Ecological Services, Stanley Eddy Park Reserve provides users with a vastly different experience than many other regional parks in the area. From hiking to the highest elevation in Wright County, to exploring a large intact maple-basswood forest, the park reserve stands as a destination in itself.

Stanley Eddy Park Reserve offers a wide range of uses relevant to the diverse interests of the region's recreationists. Visitors have the option to hike, ski, snowshoe, or ride horse on the vast trail systems that intersect with some of the best natural resources in Wright County. Single users and groups alike enjoy the backpacking experience and solitude provided within Stanley Eddy Park Reserve. The Park provides designated facilities along the trail for overnight excursions and day outings.

The park reserve reaches a wide population. Every year more users request special use permits to spend extra time within the natural resources of the reserve that are critical to providing an outdoor recreation setting not found in many areas. Activities offered during all seasons encourage visitors to return to experience all the park has to offer throughout the year.

#### **Criteria #1 Images**

[http://dms.gmrptcommission.org/uploads/applications/16-017D/DSC\\_0186\\_987db4.JPG](http://dms.gmrptcommission.org/uploads/applications/16-017D/DSC_0186_987db4.JPG)

#### **Criteria 2: Preserves a Regionally-Significant and Diverse Natural or Historic Landscape**

Stanley Eddy Park Reserve is nestled in the hills of French Lake Township, Wright County, Minnesota, and a user may feel like they are viewing a live scene from a Terry Redlin print. The hills, trees, lakes, and abundant wildlife in this reserve offer not only one of the most scenic places all year long, but also offer one of the most spectacular array of fall colors in central Minnesota. Users might also feel transported back in time, as the landscape has remained relatively untouched

---

in the last 100 years.

Stanley Eddy Park Reserve, as stated earlier, is highlighted within the Minnesota Departments of Natural Resources Biological Survey due to its abundant rolling terrain covered by red oak, sugar maple, basswood forest and numerous wetland basins with tamarack swamp, wet meadow, poor fen, shrub swamp, and emergent vegetation. Rare plant communities include ginseng, tamarack, and orchids. Rare animals that inhabit the area that were identified through this process include the Cerulean warbler and the red shouldered hawk. Not only does the park highlight these resources, the topography is also an interesting variation from the surrounding agricultural area and includes the highest point of elevation in Wright County.

### **Criteria #2 Images**

[http://dms.gmrptcommission.org/uploads/applications/16-017D/Native\\_Plant\\_Communities\\_Stanley\\_Eddy\\_Park\\_Reserve\\_178269.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/Native_Plant_Communities_Stanley_Eddy_Park_Reserve_178269.pdf)

### **Criteria 3: Well-located and Connected to Serve a Regional Population and/or Tourist Destination**

As of the 2010 Census, Wright County was the second fastest growing county in Minnesota, with a 38.6% increase in population, and is the 10th most populated county in the state of Minnesota.

The Stanley Eddy Park Reserve location is convenient for bordering townships with a population of just over 12,000 people. The Park also serves users from as far as the southern Twin Cities metropolitan area to north of the St. Cloud metropolitan area which contains a population base of almost 4 million people.

Stanley Eddy Park is conveniently accessed via improved County State Aid Highways, and the reserve itself includes several trailheads that provide ample services, parking, and easy access

### **Criteria #3 Images**

[http://dms.gmrptcommission.org/uploads/applications/16-017D/Permit\\_Chart\\_bac09b.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/Permit_Chart_bac09b.pdf)

### **Criteria 4: Fills a Gap in Recreational Opportunity within the Region**

Stanley Eddy Park Reserve is one, if not the only, true park reserve in Central Minnesota. Although various regional and local parks exist in this region, Stanley Eddy Reserve is one of a kind. It is managed strictly as a reserve with very limited intrusion. The focal point is the preservation is both its biological diversity and the protection of its natural ecosystem. Due to these reasons, the Minnesota Department of Natural Resources, through their regional planning, once identified this area for inclusion in the State Park system.

Furthermore, Stanley Eddy Park Reserve is the second largest park in Wright County: second only to Bertram Chain of Lakes Regional Park. Both are significant and important assets to our greater community, and each have unique qualities and varied uses. Another consideration to address is the significant growth of the I-94 corridor that is expected to occur in the near future which highlights the importance of protecting and preserving our natural habitats and public recreation areas for generations to come.

## **Development/Acquisition**

**Development Plan Overview :** The goal of any park reserve is to protect and minimize impacts to the surrounding habitat. This is certainly true of the Stanly Eddy Park Reserve. Its unique, rare landscape, needs to be preserved and enhanced for future generations to enjoy.

The approach, and primary goal of the development plan, is to protect and enhance the unique native habitats, educate park users on its importance, and provide various ways to experience the

---

native landscape. The master plan accomplishes this goal with the following:

- protecting the landscape through minimizing new development impacts
- identifying landscape areas to enhance/restore
- improving park signage
- improving trails
- providing better parking to allow easier park access
- developing areas for education and interpretive features
- enhancing backpack campsites

Most proposed park enhancements improve established park facilities. Only the Alama Unit, which is currently undeveloped, has all new facilities proposed. More detail is given for specific improvements in the development feature section below.

**Development Plan Upload**

[http://dms.gmrptcommission.org/uploads/applications/16-017D/Moose\\_Lake\\_Unit\\_Existing\\_Conditions\\_Improvements\\_Stanley\\_Eddy\\_Park\\_Reserve\\_1198aa.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/Moose_Lake_Unit_Existing_Conditions_Improvements_Stanley_Eddy_Park_Reserve_1198aa.pdf)

**Development Plan Upload**

[http://dms.gmrptcommission.org/uploads/applications/16-017D/NorthUnit\\_Existing\\_Conditions\\_Improvements\\_Stanley\\_Eddy\\_Park\\_Reserve\\_e10506.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/NorthUnit_Existing_Conditions_Improvements_Stanley_Eddy_Park_Reserve_e10506.pdf)

**Development Plan Upload**

**Development Plan Upload**

[http://dms.gmrptcommission.org/uploads/applications/16-017D/South\\_Unit\\_Alama\\_Tract\\_Existing\\_Conditions\\_Improvements\\_Stanley\\_Eddy\\_Park\\_Reserve\\_bc1b28.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/South_Unit_Alama_Tract_Existing_Conditions_Improvements_Stanley_Eddy_Park_Reserve_bc1b28.pdf)

**Acquisition Plan Overview :** Protecting the unique habitat, while still promoting appropriate park connections are the main goals for the Acquisition Plan. Portions of the Park Reserve are located within the unique Big Woods landscape. However, this landscape extends beyond the current park boundary in the North and South Units. The Park Reserve is also broken up into several parcels that ideally would be joined together to enhance park connectivity.

Two graphics have been developed that identify potential acquisition parcels. Both graphics include the DNR Plant Communities in the background to illustrate the extent of the unique habitat surrounding the existing park boundaries.

The first graphic identifies the need for acquisition which includes habitat protection, park connectivity, or park access improvement. The identified park access acquisition would allow for a parking lot to be installed along the trail easement enhancing access to both the Alama and South Unit. The North Unit and Moose Lake Boat Access is mainly separated by parcels with large wetlands making trail connections difficult and costly. A trail connection within the Township right of way has been identified as an alternative trail connection.

The second graphic identifies parcel acquisition priority. Parcels providing the best option for park connectivity and habitat protection have been identified as high priority. Parcels rated as medium or low provide future habitat protection or park connections.

**Acquisition Plan Upload**

[http://dms.gmrptcommission.org/uploads/applications/16-017D/Property\\_Acquisition\\_By\\_Need\\_Stanley\\_Eddy\\_Reserve\\_137f3e.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/Property_Acquisition_By_Need_Stanley_Eddy_Reserve_137f3e.pdf)

**Acquisition Plan Upload**

[http://dms.gmrptcommission.org/uploads/applications/16-017D/Property\\_Acquisition\\_By](http://dms.gmrptcommission.org/uploads/applications/16-017D/Property_Acquisition_By)

The following item provides details about one particular item or feature listed under the "Development Plan Overview"

---

**Development Feature 1**

Pedestrian and vehicular access to the Alama unit currently do not exist. Improvements to Peylon Avenue are needed and should include defining the roadway from the current residential drive ways and extending the road to the south to allow vehicles to access a new parking area within the park boundaries. Park entry signage is also needed to provide wayfinding for park users. The new parking area should include: New monument sign along Peylon Avenue, Parking lot area to allow for bus/trailer turning movements and parking, Restroom with concrete pad and wood screening, and Park signage.

---

**Development Feature 2**

Improve existing west parking lot of South Unit and park entrance off County Road 2. This parking lot has the easiest access to the park unit from County Road 2 and should be considered the main trail-head and preferred equine parking lot. Improve the existing parking lot with the following: New monument sign along County Road 2, Remove trees and lower grade of existing parking surface to allow for additional parking stalls, bus/trailer turning movements and parking, New hitching posts, Install new restroom with concrete pad and wood screening, and New park signage

---

**Development Feature 3**

Improve existing north parking lot of South Unit and park entrance off of 45th Street with the following: New monument sign along 45th Street, Expand existing parking surface to the south to allow for additional parking stalls, bus/trailer turning movements and parking, Remove existing restroom, Install new restroom with concrete pad and wood screening, and New park signage.

---

**Development Feature 4**

Trail connection options to the South Unit are also identified. Both connections require property acquisition and the preferred parcel has been identified. This parcel is wider allowing for more trail alignment options and also has a direct connection to the South Unit entrance off of 45th Street creating a safer pedestrian crossing.

---

**Development Feature 5**

Improved park entrance at Moose Lake Access with the following: New monument sign along 50th Street, Expand existing road width surface to the east to allow for trailer parking, Install new restroom with concrete pad and wood screening, and New park signage.

---

**Development Feature 6**

The North Unit and Moose Lake Boat Access is mainly separated by parcels with large wetlands making trail connections difficult and costly. A trail connection within the Township right of way has been identified as a potential trail connection. This requires further design and coordination with the Township, but could provide a less expensive trail connection than the alternate boardwalk trail also identified.

---

**Development Feature 7**

Two walk-in campsites are located directly off the trail near the parking lot. These campsites should be relocated further off the trail to offer privacy/separation from the trail, but still be close to the parking lot to allow for easy access.

---

**Development Feature 8**

Several benches exist along the trails and are all in need of replacement. Benches should be replaced to give park users a comfortable place to sit while enjoying the park.

---

**Development Feature 9**

---

An accessible trail loop and campsite have been identified along the west edge. This trail would have the same natural surface as the other trails, but grades are much flatter in this area allowing for easier accessibility.

---

**Development Feature 10**

Improving and/or developing new overlooks has been identified on the master plan and should include a new bench and selective/minimal clearing of vegetation to allow for better views of the surrounding landscape.

---

**Development Feature 11**

Improving existing parking lot and park entrance off of 60th Street with the following: New monument sign along 60th Street, Expand existing parking surface to the north to allow for bus/trailer turning movements and parking, Install new restroom with concrete pad and wood screening, and New park signage.

---

**Development Feature 12**

Enhanced Backpack Campsites-Both the North and South Units have existing walk-in campsites that are in need of improvements. The improvements have been illustrated on the master plan graphics and will include a fire ring, 15'x15' tent pad, picnic table, lock box, fire wood stand, and identification sign. The sites should be developed to take advantage of surrounding views. New walk-in campsites are proposed in the Alama Unit and will include the same features.

---

**Development Feature 13**

Removed Trails-Trails in the North and South Park Units have been identified for removal. These sections are located on steep slopes, or in poor drainage areas, resulting in continued maintenance challenges. Removed trails will be restored with tree plantings and seeding to restore these areas to the native landscape.

---

**Development Feature 14**

New Trails-New trails are proposed throughout the park. These trails will be 12' wide and accommodate hiking, cross country skiing, snowshoeing, and horseback riding. New trails will be natural unpaved surfaces and installed per Section 6 "Sustainable Natural Surface Trails" in the MnDNR Trail Planning, Design, and Development Guidelines.

---

**Development Feature 15**

Natural Resource Management-Parks staff has actively managed invasive species in this park and will continue those practices into the future. Some specific habitat restoration areas have been identified in the master plan and include restored prairie and Big Woods ecosystem. The restoration efforts should be installed and maintained per the DNR Comprehensive Wildlife Conservation Strategy.

---

**Development Feature 16**

Education Opportunities-Outdoor classrooms, interpretive signage, and interpretive trails can all be used to help educate park users on the unique habitat located within the park. Outdoor classrooms, and interpretive trail loops, would be located in areas identified by Park Staff. They should be further highlighted for the public due to their educational value.

---

**Development Feature 17**

Enhance Park Wayfinding and Signage-The park units do include some existing park signage including monument signs and park information signs. The master plan identifies upgrading these signs to match new standards Wright County Parks & Recreation is currently developing. Minimal trail wayfinding signage is present in the park and is in need of upgrades. The master plan identifies areas to enhance trail wayfinding specifically at trail entrances and where trails come together creating potential confusion for trail users. Mile markers and camp site signage should also be installed to improve wayfinding.

**Development Feature 18**

An important enhancement to the Alama unit are the ecosystem restoration efforts. Big Woods restoration, prairie installations, and improvements to the Heron rookery are all included in the Alama Unit. The Heron rookery is still active but has been declining due to the loss of trees used for nesting. The master plan identifies protecting and enhancing the rookery by maintaining a buffer zone around the rookery, limiting human access, and enhancing it by installing new artificial nesting systems used by the DNR and others.

---

**Development Feature 19**

A new trail and parking lot is proposed along the trail easement. These new amenities will improve pedestrian and vehicular access to both the Alama and South Units. The proposed parking lot will include the following: Expanded easement or property acquisition to allow enough room for the proposed parking lot, Monument sign along Pleason Avenue, Restroom with concrete pad and wood screening, and Park signage.

---

**Implementation**

**Implementation Plan :** The master plan identifies several improvements for each park unit and will be implemented as funding and priorities dictate. The higher priority improvements will address the immediate needs of park users and include trail modifications, park signage and wayfinding, and parking lot improvements. Larger development projects will require significant budgeting, planning, and design which include the development of trails, parking, and campsites in the Alama Unit, parking and trail development along the trail easement, and larger habitat restoration areas in the Alama and North Park Units.

**Summarize Acquisition and Development Costs To-Date :** A detailed list has been provided of relative costs associated with the acquisition and development of Stanley Eddy Park Reserve. This information does not include annual routine maintenance or general improvements. Please see the table labeled "Acquisition and Development Cost".

**Parks and Trails Legacy Funding**

Acquisition	Development	Total
-------------	-------------	-------

**Non-Parks and Trails Legacy Funding**

**Arts & Cultural Heritage Legacy**

Acquisition	Development	Subtotal
-------------	-------------	----------

**Clean Water Legacy Funding**

Acquisition	Development	Subtotal
-------------	-------------	----------

**Outdoor Heritage Legacy Funding**

---

Acquisition	Development	Subtotal
-------------	-------------	----------

### **Local and Other Funding Sources**

#### **Local Funding**

Acquisition	Development	Subtotal
\$971,905	\$110,000	\$1,081,905

#### **Environment & Natural Resources Trust Fund**

Acquisition	Development	Subtotal
\$60,000		\$60,000

#### **Other Funding**

Acquisition	Development	Subtotal
\$1,016,205	\$21,000	\$1,037,205

**Total:** \$2,179,110

**Grand Total Investments to Date - All Sources Listed : 2179110.00**

**Acquisition and Development Cost Projections :** Understanding development costs is an important aspect to this master plan. A cost opinion has been developed for each park unit identifying costs for each park improvement described on the master plan. This cost opinion, which is included in the attachments, is a tool that can be used for future budgeting and capital improvement project planning.

Several acquisition parcels have been identified in the master plan. No cost projections have been developed for these parcels at this point.

#### **Cost Estimate Support Information Uploads**

[http://dms.gmrptcommission.org/uploads/applications/16-017D/Stanley Eddy cost opinion\\_bc7aa7.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/Stanley Eddy cost opinion_bc7aa7.pdf)

**Acquisition and Development Phasing Plan :** The higher priority development projects will be completed within the next one to five years. These improvements include trail modifications, park signage and wayfinding, and parking lot improvements.

Larger development projects will be completed as budget allows, but its the desire to have these projects completed in five to eight years. Projects include the development of trails, parking, and campsites in the Alama Unit, parking and trail development along the trail easement, and larger habitat restoration areas in the Alama and North Park Units.

The master plan identifies priority parcels surrounding the existing park units. As parcels become available for purchase, the County can use these acquisition plans to prioritize how they should move forward in purchasing land.

#### **Phasing Plan Support Information Uploads**

## Cost Projections for Implementation Plan

**Acquisition:** 1532500.00

**Development:** 1792975.00

**Projected Total:** 3325475.00

## Operational

**Joint Organizations Responsibilities :** N/A

**Maintenance/Operations Plan :** Wright County is charged with the planning, acquisition, operation, and maintenance of county/regional parks trails and public lands.

The Wright County Board of Commissioners establishes policies and goals for the Countys resources and provides capital and operational funding through and annual budgeting process. The Park Commission appointed by the County Board of Commissioners serves as a citizens advisory committee for the development and operation of the park and trail system making recommendations to the County Board on policy and budget. The specific responsibilities of the Parks Commission include:

Review, prioritize, and make recommendations concerning development initiatives.

Review, prioritize, and make recommendations on acquisitions.

Review annual operating and capital improvement budgets for consistency within the adopted Departmental Strategic Plan.

Represent the citizens of Wright County.

Wright County Park Ordinances address issues and provide regulations for general use and conduct of parks, trail and open space within the departments jurisdiction. Currently Wright County has one full-time year-round Park Ranger along with five-part time park patrols all whom work closely with the Wright County Sheriffs Department to enforce regulations, park hours, permitted and prohibited activities, educates visitors, provide a public service to users, and helps enforce all other Wright County Park Ordinances.

Maintenance of facilities and grounds are essential to protect the public investment, manage natural resources, and ensure a high user experience. Annual work plans are developed each year to help guide the management and maintenance of Stanley Eddy Park Reserve, these plans focus on invasive species treatment and monitoring, camp site, trail and trailhead maintenance, erosion controls, monitoring and prevention, mowing, and signage. The annual plan outlines the work to be completed and established responsibilities and budget parameters.

## M/O Support Material Uploads

[http://dms.gmrptcommission.org/uploads/applications/16-017D/Table Acquisition Development Cost\\_c9d9b6.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/Table_Acquisition_Development_Cost_c9d9b6.pdf)

**Ecological/Land Resources Plan :** The Stanley Eddy Park Reserve property is protected in perpetuity for its recreational, natural resource, and habitat values. Management activities and facility development will include methods, infrastructure, and materials that protect the natural area. The management goals to achieve this protection include:

1) Preservation and creation of native plant communities.

2) Protection and improvement of habitat, including preservation of wildlife connections to adjacent

---

properties.

3) Protection and creation of public connections to the natural world by preserving scenic views and providing interactive experiences with the sites natural resources.

Management of Stanley Eddy Park Reserve is necessary to enhance and maintain the sites natural value. The current Biological Survey which highlight the area Natural Resources will be used to guide resource planning.

Further site review and basic stewardship, including attempts to identify/remove and control invasive species, will have a positive impact toward the goals of the park. The following are proposed management goals for the park reserve.

#### Short Term Natural Resource Management Goals (1-5 years)

Maintain the ecological condition of the park reserve.

Develop a formal Restoration and land use management plan, identified in the 2019 departments operating budget.

Continue to locate, identify, and treat areas of invasive species on the property.

Contain or reduce the extent of invasive species on the property.

Develop and maintain partnerships for the enhancement and management of the natural resources, including partnerships with MnDNR, USFW, School Districts, Soil and Water Conservation District, non-profit groups, and citizen volunteers.

#### Long Term Natural Resource Management Goals (5 + Years)

Enact planned restoration of native plant communities on agricultural grounds, mainly in the Alama Unit

Implement and manage restoration of native plant communities.

Buffer existing high quality natural resources areas.

Protect and enhance wildlife habitat.

Continue invasive species controls.

Establish volunteer projects.

Establish environmental education signage and interpretation.

Manage diseased and hazard trees.

### **Ecological/Land Resources Support Material**

[http://dms.gmrptcommission.org/uploads/applications/16-017D/Native\\_Plant\\_Communities\\_St Stanley Eddy Park Reserve\\_f3994c.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/Native_Plant_Communities_St Stanley Eddy Park Reserve_f3994c.pdf)

[http://dms.gmrptcommission.org/uploads/applications/16-017D/South\\_Unit\\_Buckthorn\\_Treatment\\_22 5539.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/South_Unit_Buckthorn_Treatment_22 5539.pdf)

**Annual Routine Maintenance and Operations Cost Total : 21286.54**

### **Programming**

**Programming Plan :** The nature of Stanley Eddy Park Reserve lends itself to self guided recreation more than traditional guided recreation programs such as hiking, cross country skiing, snowshoeing, and camping. However, Wright County Parks and Recreation does intend to expand the programming at Stanley Eddy in the future. Currently the park is utilized by groups such as Dassel-Cokato schools and scout troops for field trips and hikes. Additionally individuals use the park for primitive camping, trail running, hiking, wildlife viewing, snowshoeing, and cross country skiing. The Parks and Recreation Department recently made improvements to the primitive campsites that are utilized from April through October by people from all over. In 2018 we issued over 60 permits for Stanley Eddy and in 2017 we issued 55 permits for camping in the park. The past several years we have since an increase in usage of our primitive campsites.

---

Some of our future plans include adding in new primitive sites to the Alama Unit, relocating some of the existing primitive sites, adding an interpretative signage, adding an interpretative trail, and working with local vendors such as Hike Hoppers to offer more guided programs. The interpretative trail and signage will benefit the schools, scout troops and public as they come to the park to understand more about the history of the park and the Big Woods ecosystem. Working with groups such as Hike Hoppers to offer guided programs at the park is an intentional effort to bring more people to the park to experience what it offers.

Another aspect of the park is the Equine trails. Stanley Eddy is a unique place to bring your horse and ride. The terrain is more hilly than most other equine trails in the area and with the development of the Alama unit it will provide enough trail that it would be considered a destination trail ride for horseback riders. It currently offers close seven miles of equine trail between the north and south unit. At this time you would need to trailer to both units. You will notice in master plan that we have proposed trail connections between the North and South Units as to the Alama Unit. Once all units are connected there would be over 10 miles of trail for everyone to enjoy.

**Annual Programming Cost :** 4500.00

**Annual Revenues from Programming and Fees/Charges Total :** 00.00

**Outreach and Marketing Plan :** Wright County Parks and Recreation currently utilizes the county website, calendar, and social media sites to promote their park system and programs. In addition to these electronic avenues we create and send out full page color insert into the county wide paper that reaches all businesses and households within Wright County twice a year.

#### **Outreach and Marketing Support Uploads**

[http://dms.gmrptcommission.org/uploads/applications/16-017D/Winter Insert\\_2019\\_a8e813.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/Winter Insert_2019_a8e813.pdf)

[http://dms.gmrptcommission.org/uploads/applications/16-017D/Parks Brochure\\_190914.pdf](http://dms.gmrptcommission.org/uploads/applications/16-017D/Parks Brochure_190914.pdf)

**User Metrics and Research Plan :** We currently keep track of all camping permits that are issued at Stanley Eddy. Those permits are free to obtain and can be done online, over the phone, or in person. Any programs that are planned at the park will have a participation list that is required to send into us for tracking. We also communicate with the schools and scout troops that utilize the park to have an estimation of how many kids they will have when they do their field trips. Wright County Parks and Recreation utilizes pressure tube sensors to conduct vehicle counts at the parking lots of the park as well.
